Hazardous Equipment Affidavit

Pertaining to all purchases of potentially dangerous components

PLEASE READ CAREFULLY

The following must be completed, signed and dated for purchase of any transformer over 30 milliampere short circuit current or energy storage capacitor over 50 joules

May be faxed to 1 603 672 5406 or E Mailed to <sales@amazing1.com>

TRANSFORMERS

High voltage transformers that can supply currents in excess of 30 milliampere are considered potentially lethal. A ground fault interrupter (GFI) shuts down any ground at over 5 milliampere. Many of our high voltage transformers are ground referenced creating an extreme shock hazard.

CAPACITORS

Capacitors with voltage ratings over 450 volts and energy storage over 50 joules are potentially lethal. Capacitors can hold these lethal charges indefinitely and must be discharged with a suitable probe before contacting.

These components are intended for experienced personal in handling and working with high voltages.

Insert part numbers and values

I _____ employed by _____

and am fully aware that the *electrical components* as sold will require proper housings, safety interlocks, fusing, labelling, qualified operating experience and safety compliances for their intended use. I fully understand all hazards and liabilities with the product in question. I will not hold **Information Unlimited** responsible in any way for injuries/or damages resulting from proper or improper use of these components, parts or finished products.

SIGNED _____

DATED _____

*DRIVERS LICENSE OR OTHER IDENTIFICATION or _____

***Drivers license/ID are not required for purchases to known companies.**

Hazardous Equipment Affidavit

Pertaining to all purchases of potentially dangerous electronic kits, assemblies and components

PLEASE READ CAREFULLY

The following must be completed, signed and dated for purchase of Class IV laser systems, high powered Tesla coils, magnetic launchers, rail guns, high energy systems, power supplies and components. **May be faxed or E Mailed to and from companies with known letter head**

Insert model#

CLASSIV LASERS: These devices are in full FDA compliance. They are capable of inflicting permanent eye and skin damage, starting fires and damaging objects. These products require high voltages that are also electrically dangerous.

TESLA COILS: Air discharge Tesla coils models BTC30 and BTC40 may require enclosure into a properly made Faraday cage when operated near sensitive electronic equipment or in congested areas. Even though the output is not that dangerous, high voltages are required in the primary circuits that are very dangerous.

ELECTRO-KINETIC: These devices are capable of projecting objects at ballistic velocities that can kill or maim a human being. They can cause objects to explode with high detonation velocities, create intense magnetic fields and cause damage to sensitive equipment. Devices as sold use very dangerous life threatening high voltages and will require proper enclosures, interlocks and labeling to prevent accidental contact.

EMP/MARX: These devices are capable of damaging electronic equipment. They are open construction and are extremely electrically hazardous. They are intended to be operated by experienced personnel in the related fields of high voltage and high energy devices.

SPECIALY BUILT MODULES or SYSTEMS are built to customer specifications with proper enclosing, shielding, interlocking, labeling and warnings are the responsibility of the purchaser. Proper operating procedures conducive to the surroundings are the responsibilities of the purchaser. It is the purchasers responsibility to verify any necessary compliances or regulations necessary for using this equipment at his premises.

BRIEF PRODUCT DESCRIPTION

I _____ employed by _____
am fully aware that these *devices* as sold will require proper housings, safety interlocks, fusing, labelling, qualified operating experience and safety compliances for their intended use. I have read and initialled each page of the enclosed plans/instructions and fully understand all hazards and liabilities with the product in question. I will not hold **Information Unlimited** responsible in any way for injuries/or damages resulting from proper or improper use of the plans, parts, kits or finished products.

To whom it may concern:

The laser product you are purchasing is an uncertified laser device as specified by the FDA/CDRH for end use. The uncertified product as sold is intended to be used in a certified laser product requiring the following:

Labelling: (examples as shown)

1. A keyswitch with non removeable key in the “on” position
2. Emissions indicator lamp
3. Aperture shutter
4. Emission delay circuitry
5. Protective interlocks

You may obtain the performance standard on the web at.....[FDA LASER PERFORMANCE STANDARDS](http://www.fda.gov/cdrh/oc/standards/laser.htm)
