

## Tesla Coils and Free Energy

There is a lot of information and discussion on the internet regarding free energy possible from the use of Tesla coils and other Tesla designs and paraphernalia. If you are interested in pursuing this direction using our coils or related equipment, we can provide the items but we must refer you to other websites that discuss how this material can be used for free energy.

There are a couple reasons for this: first, a lot of this material encourages going against power company regulations. On the other hand, many power companies will deduct any energy you generate from your monthly bill.

Second, our workload is in other fields, and we have not been able to do any research or investigate this subject material whatsoever. So it is suggested for those who want to use some of our equipment for this reason, to find a reliable source of this information elsewhere on the internet. See what they have to offer to assist you in the use of these items for these functions. We can provide you with the items, but you must conduct your own research into these fields and collaborate or discuss with others who are doing the same.
