

# Anti Electronic Harassment Program

REV090620Z

Note this 3 page form must be emailed to [sales@amazing1.com](mailto:sales@amazing1.com) and completely filled out before any further communication or action will be taken

We have many people complaining of weird and bizarre effects that are happening to them, their family and their pets. High tech experimental devices, both legal and illegal, could be the source of your problem. The **First Step** of our approach is to gather relevant information from you to help us determine what may be the cause of the problem. If we determine this is a legitimate issue, we then move to the **Second Step** and try to identify the nature of the energy being used against you and your family. **There may be a consulting fee for this service if we must physically participate**, and it may require using some of our detectors, for example, to determine if the basic properties are electromagnetic (transverse waves) or compressional waves (longitudinal) and identify between the two.

**Third Step -- We need you to provide information on the following items and then return this form to us:**

*In addition to this information, you can send us a detailed report (along with corroborating reports from witnesses) describing the phenomena with as much data as you think would be helpful. **FILL OUT THE FORM ON PAGE 3. INCLUDE YOUR NAME/ADDRESS AND THE NAMES AND ADDRESS OF WHO YOU BELIEVE THE ONES CAUSING YOU THIS DISCOMFORT!!** Please Note:- We charge a small fee for this service \$20.00, as this takes time and research to analyze the Harassment claim.*

1. Many times TV sets, pest control devices, and faulty appliances can emit high frequency sounds that can cause discomfort. Most of these can be detected by our #HT90 (below) directional high frequency sound detector.\* But first try turning off **all** your electronic devices (and unplug them so they do not even get trace power) and see if the effects diminish or disappear. If they do, then repower the devices, note the times that they are powered back on, and note the time when your effects return. In such cases, you can isolate and resolve the problem this way on your own. Please note some of our home protection, bark deterrents and pest control devices will cause some of these effects.

2. Determine and note the effects, such as ringing of the ears, tingling sensations, dizziness, headache, nausea, etc.

3. Are there times of the day when the effect is stronger than others (before sleep, while waking, early morning, etc.) or is it at the same strength and consistency throughout the day? Are there actions that make the effects go away (such as plugging your ears)?

STRONGEST TIMES

WEAKEST TIMES

ACTIONS THAT CAUSE THE EFFECT TO DIMINISH OR STOP

4. Try to determine the source. Is the effect stronger or weaker inside or out? Are there rooms/points/areas/directions where it is stronger than others? Go outside and walk around the premises to try and determine the direction of the source.

INTERIOR LOCATION/ROOM

STRENGTH OF EFFECT

INTERIOR LOCATION/ROOM

STRENGTH OF EFFECT

EXTERIOR LOCATION STRENGTH OF EFFECT

EXTERIOR LOCATION STRENGTH OF EFFECT

5. Are there locations **away** from your premises where the effect is experienced? Note them, and their relative strengths. It would be best to record effects at more than one distance, such as a couple hundred feet, a couple hundred yards, and half a mile.

REMOTE LOCATION APPROX DISTANCE STRENGTH OF EFFECT

REMOTE LOCATION APPROX DISTANCE STRENGTH OF EFFECT

REMOTE LOCATION APPROX DISTANCE STRENGTH OF EFFECT

6. Please find at least two (2) non-related corroborating witnesses to validate the effects of the harassment that you are perceiving.

7. Are there any people who would go these extremes to harass you? How close are they to where you experience this discomfort?

\_\_\_\_\_

After you have given us this information, we will contact you about proceeding with the **third** step, which is to determine the source of the harassment, try to identify those who are responsible, and then decide what type of further action can be taken. There may be a consulting fee for this service, and a fee for using some of our detectors such as our **HT90** sonic and **BD70** electromagnetic detector to initially determine the type of harassment. Further equipment may be needed, depending on the type of harassment. Once this is concluded we regroup for the next course of action.

The following is a list and brief description of some devices that may help to determine what is being used against you (for further information please see our website [www.amazing1.com](http://www.amazing1.com)) **But please do not email or call us about these devices or any other questions until you have first filled out this form and returned it to us.**

#HT90P High frequency microphone detects *ultrasonic sound waves* *purchase for \$349.95*

#PSP60 Third Generation Phasor Pain Field Pistol 135db *purchase for \$409.95*

#CANINE10RC- HP10 High Power for dogs/animals' pests *purchase for \$494.95*

#PPF40RC-HP10 High Power pain-field (4 Transducers) *purchase for \$439.95*

#PCC30RC-HP10 High Power pain-field (8 Transducers) *purchase for \$599.95*

#MGD10 Low frequency magnetic field detector for magnetic energy *purchase for \$349.95*

#FISH90 2000-volt 2 joule electric fisherman purchase for **\$349.95**

#PPP10-HP Third Generation Handheld Pistol-type pain field Emitter purchase for \$154.95

#IOD40 Ion and electric field detector for detecting static field devices used against you purchase for \$129.95

#BHT60 Body heat detector for thermal shock sources of long wave IR used against you purchase for \$179.95

#BD70 Detects microwave and EMP pulse devices being used against you purchase for \$89.95

*There is another way to retaliate! But first make sure the people **ARE not USING SOUND OR ULTRASOUND AGAINST YOU PURPOSELY** but have pest control devices that may be bothering you by accident. Some people are very sensitive and hear the ultra- sound. But if you know for sure they are intentionally causing the harassment you might want to “shoot back” using our above **PPP10-HP Generation Handheld Pistol-Type Emitters** a very effective and popular device with a lot of flexibility.*

Now understand if you get caught and it is proven it was not the target you were harassing you could get yourself into trouble. So be aware!

**It is a good idea to get the address and possibly the full name of the people that are living there and we can check our files to see if they purchased any such product from us. And of course, if they have, it is pretty good evidence they are the target causing the problems.**
