

Magnetic Pulsers – Additional Information

There are many proven benefits to using a Magnetic Pulser. They deal with people's aches and pains, and improve upon many different health concerns and conditions. The magnetic pulsing action is more powerful, and effective, than traditional magnetic therapy. The pulsing coil takes magnetic therapy to a whole new dimensional level, with exciting break through results and benefits.

Permanent magnets, no matter how strong, will not produce the same results as pulsed-field induced back-emf currents. You must have a high-intensity, time-varying, magnetic impulse; not just a magnetic field. Magnets have their uses, but they work in different ways with different results. Equally important is the fact that we have "electric-powered" brains: all our thoughts and perceptions are complex networks of electrochemical signals and electromagnetic fields that pulse and sweep throughout the brain. It thus makes sense that harmonic electrical revitalization of the brain can influence your mental state and positively alter mental effectiveness.

Externally applied magnetic pulses to the lymphatic system, the spleen, kidney & liver, help neutralize germinating, latent and incubating parasites of all types, helping to block re-infection. This speeds up the elimination of disease, restores the immune system, and supports detoxification. The movement of the lymphatic system is essential in purifying, detoxifying and regenerating the body, supporting the immune system, and maintaining health. Normally the lymph is pumped by the movement of our body through vigorous exercise and physical activity. However, a clogged, sluggish, or weak lymphatic system prevents the body from circulating vital fluids and eliminating toxic wastes, thus weakening the immune system. This makes us vulnerable to infections and diseases. In order to be healthy, it is essential to keep the energy balanced and fluids moving so that the body may operate in its full healing capacity. In addition, each cell must be enlivened with its own unique energetic frequencies and harmonic energy-state, and be harmonically connected to the life-force energy throughout the rest of the body.

Pulsed Electromagnetic Fields influence cell behavior by inducing electrical changes around and within the cell. Improved blood supply increases oxygen pressure, activating and regenerating cells. Improved calcium transport increases absorption of calcium in bones and improves the quality of cartilage in joints, decreasing pain significantly. Acute and even chronic pain may disappear completely.

As we get older, hormone production falls considerably and is one of the contributors to aging. This theramagnetic pulser uses complex energy pulses of magnetic waves to stimulate certain body functions. It revitalizes and rejuvenates. It accelerates production of vitally important hormones, often providing miraculous effects. Magnetic Pulsing aids in human growth hormone production and neurotransmitter production. The results are remarkable, increasing vitality, sexuality, accelerated healing, learning and reduction of memory loss with even reports of increased psychic ability for some people.

Users are experiencing faster healing of injuries, including bone fractures, carpal-tunnel and drug free arthritis pain relief. The pulsed magnetic field stimulates blood flow and cellular respiration in the area applied. There are reports of Migraine headaches ceasing after magnetic therapy is applied.

This pulser can be worn, held or wrapped to any part of the body with your hand or held in place with a tension bandage. You can use your pulser while driving and on the go, rather than having to stop and apply it when sitting or lying down as is necessary when using a 110 volt standard Magnetic Pulser.

Note: currently, non-pulsed magnets are being sold for health applications and are accepted by the medical profession. These non-pulsed magnets only produce a weak stationary field and are less effective than pulsed devices. Our pulsers, as sold, have much more functional flexibility and are not invasive. They are not yet FDA tested. We now offer the device as a fully functional product that is suitable for experimental testing.

The theramagnetic pulser is being sold only for experimental research and testing. It is warrantied for 1 year.

The Magnetic Pulser components are assembled and built in the US.
